## WORK HISTORY

**Molloy Moreno LLC** — *Front End Developer*
Issaquah, WA | June 2021 - Sept 2021
Designing and developing the user interface using Adobe XD and React.js for Project Elpis, a serverless web application to help at-risk students in New York City with tracking their career progress.

**Democracy Lab** — *UI Designer / Developer*
Issaquah, WA | April 2021 - Present
Volunteering as a designer/front-end developer in various social civic projects.
- ❖ Designed the user interface for the user introduction section of the iSeaTree mobile app using Figma, helping kids in Washington State identify and learn about the local indigenous tree species.
- ❖ Using React.js to develop the website for Accessibility Ratings, a web app to help users submit feedback about accessibility of popular apps to their respective companies.

**Self Employed Designer / Developer** —
Issaquah, WA | Aug 2020 - present
Designing and developing projects of self-interest. Published self-made designs on design forums like Dribbble. Developed projects include:
- ❖ Google Chrome extension to block YouTube videos
- ❖ Distance calculator for any 2 cities in the US using React.js
- ❖ Andrew Yang White House.gov mockup.

- ❖ Bellevue College registration system mockup
- ❖ My own version of Wordament, a word game I used to play

**Endevre Technologies** — *Chief Marketing Officer / lead designer*
Cupertino, CA | Sept 2017 - present
Negotiated with clients to sponsor company products at hackathons and designed/prototyped web pages for the company and associated products.

**Quora** — *Online Writer / Blogger*
Seattle, WA | Apr 2017 – present
Answered questions on Quora about various topics, including history and tech.
Generated over 25 million views and 10K+ followers without advertising. Managing my own blogs on Quora that have over 30,000 followers. Answers have been translated into multiple languages.

**Upwork** — *Writing Freelancer*
Seattle, WA | Jun 2019 – Sep 2019
Partnered with clients to publish related articles on Quora that dealt with specific topics, including finance and computer software in order to drive traffic to client's websites
